

Run, Review, Reflect, Repeat

Thierry Sans

Our software development process so far

Product backlog

- Personas
- User Stories
- Tasks (with brief description, story points, dependencies and details)

Sprint backlogs - for each sprint

- Sprint Plan
- Provisional burndown chart

Tracking progress

Sprint backlogs - for each sprint

- Sprint Plan
- Provisional Burndown Chart

Planning **before** the sprint

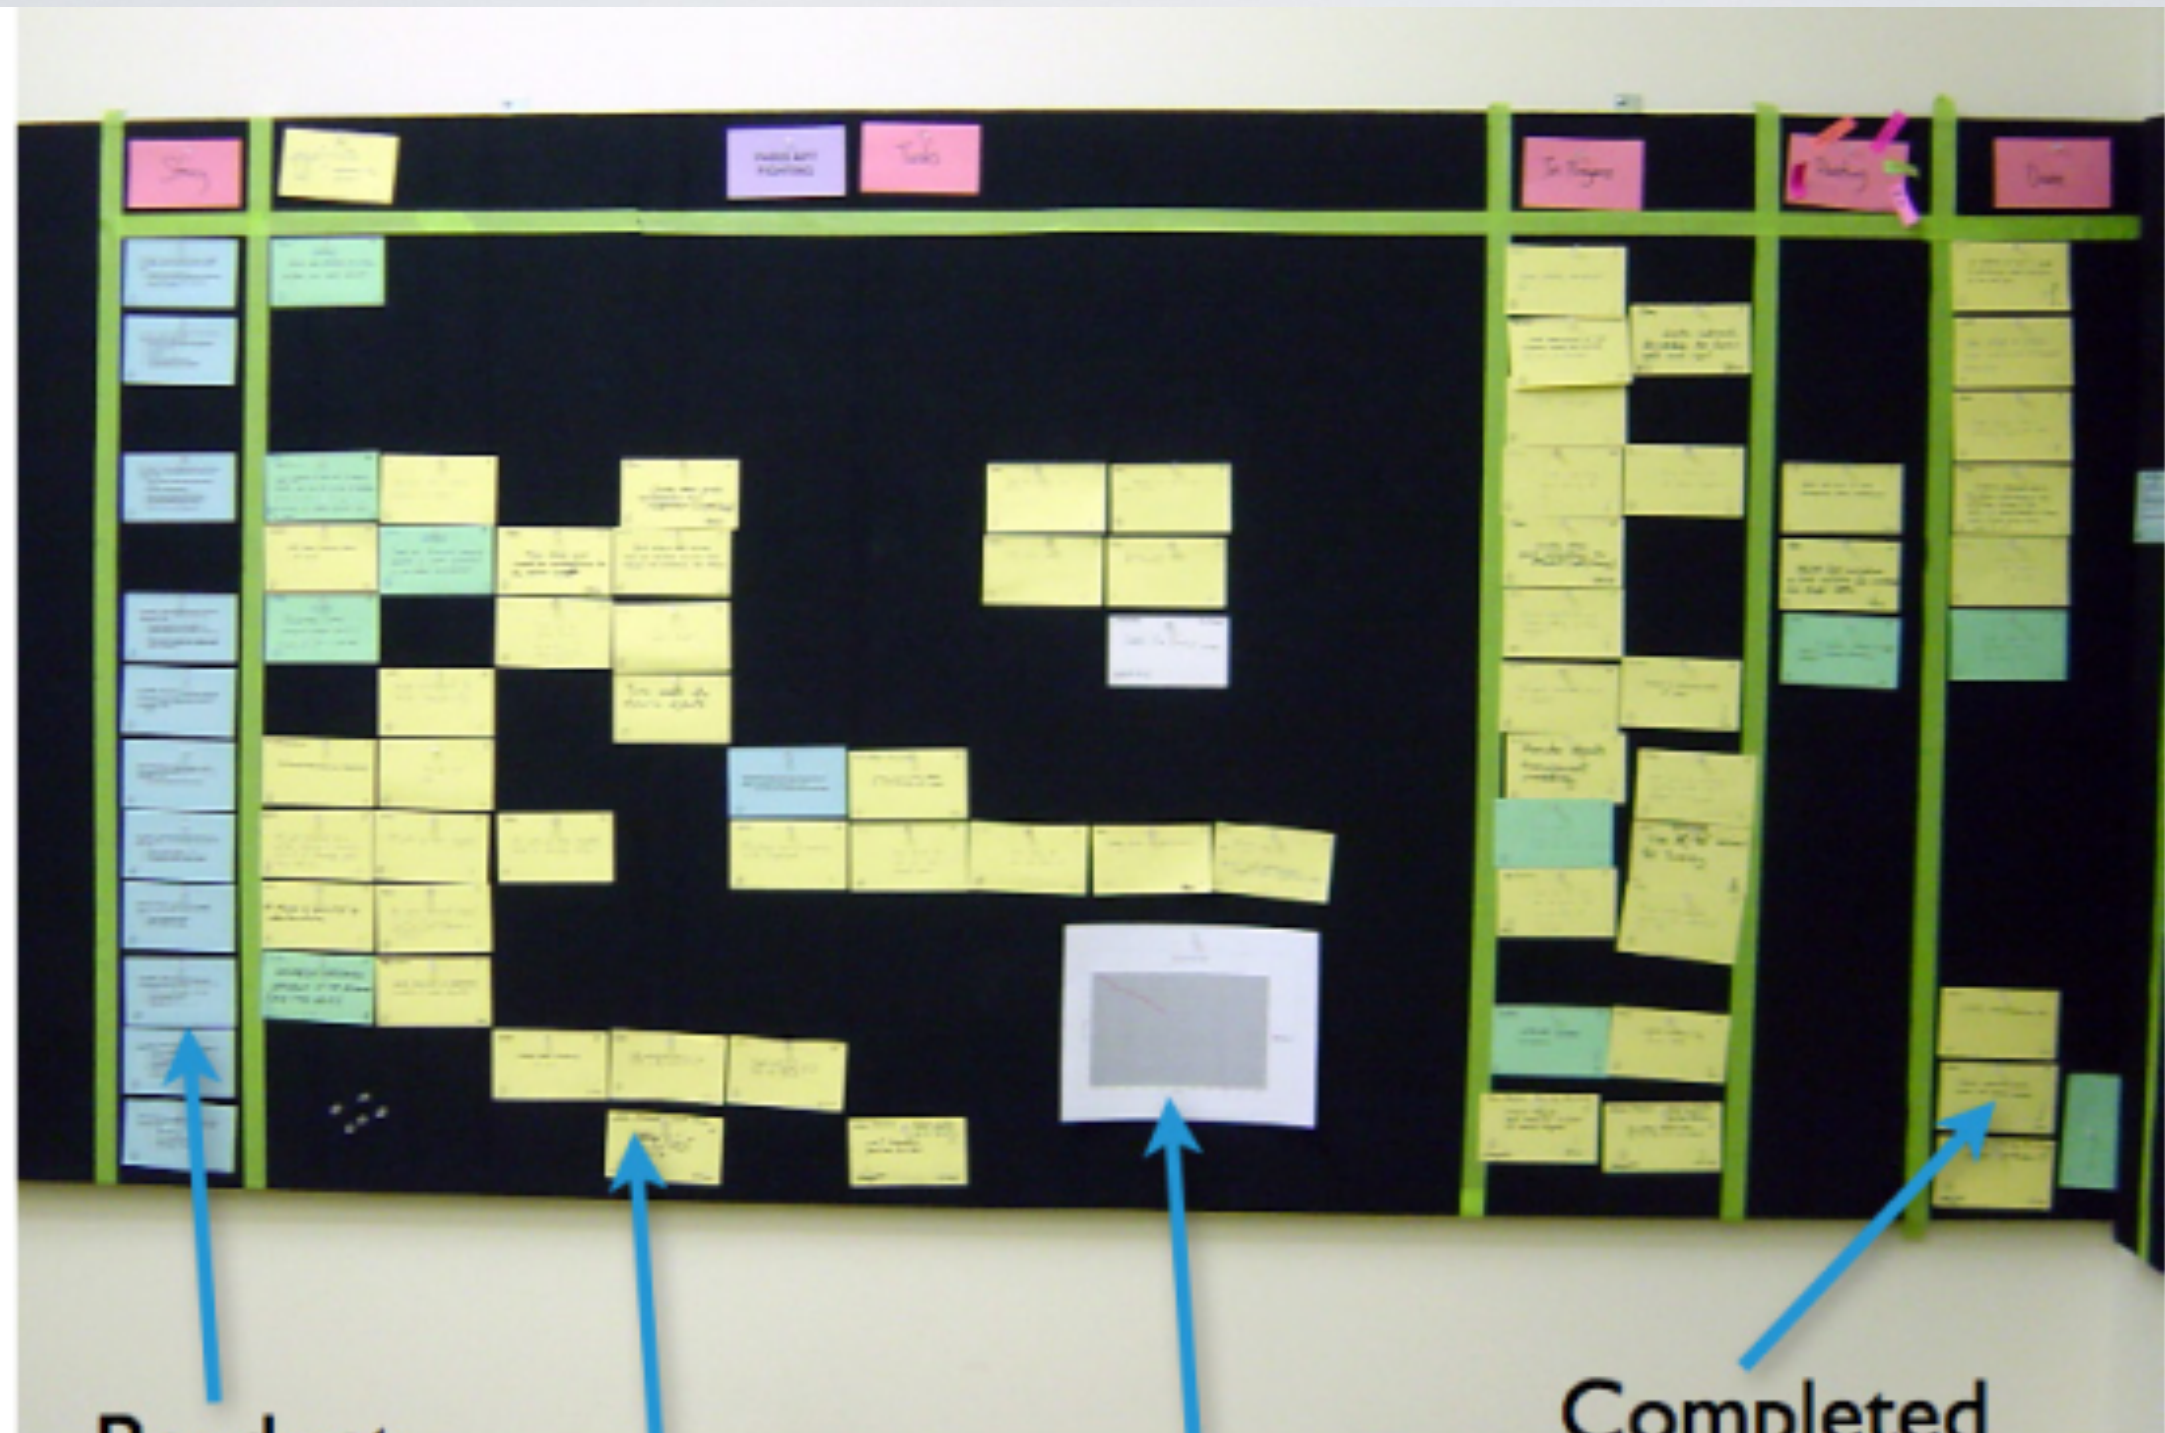

- **Taskboard (a.k.a the *Kanban*)**
- **Sprint Execution Report**
- **Actual Burndown chart**

Tracking progress **during** the sprint and **report** after the sprint

Run

The taskboard (a.k.a the *Kanban*)

Review and Reflect

Review

- What data do we look at?
- What do we learn from these data?

Reflect

- How to assess what we did well?
- How to assess what we not do well?
- How to identify what we will do better in our next print?

and finally repeat!
